No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the Publisher. *Exceptions:* Explicit permission from Academic Press is not required to reproduce a maximum of two figures or tables from an Academic Press article in another scientific or research publication provided that the material has not been credited to another source and that full credit to the Academic Press article is given. In addition, authors of work contained herein need not obtain permission in the following cases only: (1) to use their original figures or tables in their future works; (2) to make copies of their papers for use in their classroom teaching; and (3) to include their papers as part of their dissertations.

The appearance of the code at the bottom of the first page of an article in this journal indicates the Publisher 's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1999 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 263

Number 1, October 10, 1999

Virus Replication/Gene Expression

The Tomato Golden Mosaic Virus Transactivator (TrAP) is a Single-Stranded DNA and Zinc-Binding Phosphoprotein with an Acidic Activation Domain — Marcos D. Hartitz, Garry Sunter, and David M. Bisaro 1

Biochemical and Genetic Evidence for Interactions between Potato A Potyvirus-Encoded Proteins P1 and P3 and Proteins of the Putative Replication Complex — Andres Merits, Deyin Guo, Lilian Järvekülg, and Mart Saarma 15

Requirement of Replication Licensing for the Dyad Symmetry Element-Dependent Replication of the Epstein–Barr Virus *oriP* Minichromosome — Masaki Shirakata, Ken-Ichi Imadome, and Kanji Hirai 42

Lack of Responsiveness of a Nuclear Factor-κB-Regulated Promoter to Transactivation by Human Immunodeficiency Virus 1 Tat in HeLa Cells — Gloria D. Kelly, Cindy B. Morris, and Margaret K. Offermann 128

Internal Initiation of Translation Directed by the 5′-Untranslated Region of the Tobamovirus Subgenomic RNA I_2 — M. V. Skulachev, P. A. Ivanov, O. V. Karpova, T. Korpela, N. P. Rodionova, Yu. L. Dorokhov, and J. G. Atabekov 139

Role of Primary Constitutive Phosphorylation of Sendai Virus P and V Proteins in Viral Replication and Pathogenesis — Cheng-jun Hu, Atsushi Kato, Mary C. Bowman, Katsuhiro Kiyotani, Tetsuya Yoshida, Sue A. Moyer, Yoshiyuki Nagai, and Kailash C. Gupta 195

Chlorella Virus PBCV-1 Encodes a Functional Homospermidine Synthase — Annette Kaiser, Michael Vollmert, Dorothea Tholl, Michael V. Graves, James R. Gurnon, Weimei Xing, Amber D. Lisec, Kenneth W. Nickerson, and James L. Van Etten 254

Virus Structure and Assembly

Studies on Hybrid Comoviruses Reveal the Importance of Three-Dimensional Structure for Processing of the Viral Coat Proteins and Show That the Specificity of Cleavage Is Greater in *trans* Than in *cis* — Anthony J. Clark, Peter Bertens, Joan Wellink, Michael Shanks, and George P. Lomonossoff 184

Virus–Cell Biology

Hepatitis C Virus RNA Polymerase and NS5A Complex with a SNARE-like Protein — Hong Tu, Lu Gao, Stephanie T. Shi, Deborah R. Taylor, Tao Yang, Austin K. Mircheff, Yumei Wen, Alexander E. Gorbalenya, Soon B. Hwang, and Michael M. C. Lai 30

Characterization of Wild Lambdoid Bacteriophages: Detection of a Wide Distribution of Phage Immunity Groups and Identification of a Nus-Dependent, Nonlambdoid Phage Group — Luis Kameyama, Leonor Fernández, Jesús Calderón, Adriana Ortiz-Rojas, and Thomas A. Patterson 100

Aminoacylation of tRNAs Encoded by *Chlorella* Virus CVK2 — Kensho Nishida, Takeru Kawasaki, Makoto Fujie, Shoji Usami, and Takashi Yamada 220

Double-Layered Membrane Vesicles Released from Mammalian Cells Infected with Sendai Virus Expressing the Matrix Protein of Vesicular Stomatitis Virus — Takemasa Sakaguchi, Tsuneo Uchiyama, Yutaka Fujii, Katsuhiro Kiyotani, Atsushi Kato, Yoshiyuki Nagai, Akihiko Kawai, and Tetsuya Yoshida . . 230

Viral Pathogenesis and Immunity

Increased Neurovirulence of Polytropic Mouse Retroviruses Delivered by Inoculation of Brain with Infected Neural Stem Cells — David J. Poulsen, Cynthia Favara, Evan Y. Snyder, John Portis, and Bruce Chesebro 23

HIV-1 Evolves into a Nonsyncytium-Inducing Virus upon Prolonged Culture *in Vitro* — Atze T. Das, Aafke Land, Ineke Braakman, Bep Klaver, and Ben Berkhout 55

Development of a Novel Mouse Model for Dengue Virus Infection — J. An, J. Kimura-Kuroda, Y. Hirabayashi, and K. Yasui 70

Type I Interferon Is a Powerful Inhibitor of *in Vivo* HIV-1 Infection and Preserves Human $CD4^+$ T Cells from Virus-Induced Depletion in SCID Mice Transplanted with Human Cells — Caterina Lapenta, Stefano M. Santini, Enrico Proietti, Paola Rizza, Mariantonia Logozzi, Massimo Spada, Stefania Parlato, Stefano Fais, Paula M. Pitha, and Filippo Belardelli 78

Minor Displacements in the Insertion Site Provoke Major Differences in the Induction of Antibody Responses by Chimeric Parvovirus-like Particles — Paloma Rueda, Alicia Hurtado, Manuel del Barrio, Jorge Luis Martínez-Torrecuadrada, Soren Kamstrup, Claude Leclerc, and J. Ignacio Casal 89

Fatal Immunopathogenesis by SIV/HIV-1 (SHIV) Containing a Variant Form of the $HIV\text{-}1_{SF33}$ *env* Gene in Juvenile and Newborn Rhesus Macaques — Paul A. Luciw, Carol P. Mandell, Sunee Himathongkham, Jinling Li, Tesi A. Low, Kim A. Schmidt, Karen E. S. Shaw, and Cecilia Cheng-Mayer 112

Nematode Transmission of Tobacco Rattle Virus Serves as a Bottleneck to Clear the Virus Population from Defective Interfering RNAs — Peter B. Visser, Derek J. F. Brown, Frans Th. Brederode, and John F. Bol 155

Evaluation of Tick-Borne Encephalitis DNA Vaccines in Monkeys — Connie Schmaljohn, David Custer, Lorna Vander-Zanden, Kristin Spik, Cynthia Rossi, and Mike Bray 166

Plasmid DNA Vaccines Are Effective in the Absence of IFNγ — Daniel E. Hassett, Jie Zhang, and J. Lindsay Whitton 175

Comparison of the Protective Efficacy of Naked DNA, DNA-based Sindbis Replicon, and Packaged Sindbis Replicon Vectors Expressing Hantavirus Structural Genes in Hamsters — K. I. Kamrud, J. W. Hooper, F. Elgh, and C. S. Schmaljohn 209

Time-Related Changes in Full-Length Hepatitis C Virus Sequences and Hepatitis Activity — Kazuyoshi Nagayama, Masayuki Kurosaki, Nobuyuki Enomoto, Shin-ya Maekawa, Yuka Miyasaka, Jun-ichi Tazawa, Namiki Izumi, Fumiaki Marumo, and Chifumi Sato 244

Author Index for Volume 263, Number 1 263

Number 2, October 25, 1999

Rapid Communication

Release of Coronavirus E Protein in Membrane Vesicles from Virus-Infected Cells and E Protein-Expressing Cells — Junko Maeda, Akihiko Maeda, and Shinji Makino 265

Virus Replication/Gene Expression

Comparisons of Defective HTLV-I Proviruses Predict the Mode of Origin and Coding Potential of Internally Deleted Genomes — Shawn A. Hill, Maureen Shuh, and David Derse . . . 273

Recombination between Genomic RNAs of Two Cucumoviruses under Conditions of Minimal Selection Pressure — R. Aaziz and M. Tepfer 282

Genetic Analysis Reveals That Both Haemagglutinin and Neuraminidase Determine the Sensitivity of Naturally Occurring Avian Influenza Viruses to Zanamivir *in Vitro* — S. J. Baigent, R. C. Bethell, and J. W. McCauley . . . 323

Related RNAs in Lepidopteran Cells after *in Vitro* Infection with *Hyposoter didymator* Virus Define a New Polydnavirus Gene Family — Anne-Nathalie Volkoff, Pierre Cérutti, Janick Rocher, Marc C. P. Ohresser, Gérard Devauchelle, and Martine Duonor-Cérutti 349

Nucleocapsid Formation and/or Subsequent Conformational Change of Rabies Virus Nucleoprotein (N) Is a Prerequisite Step for Acquiring the Phosphatase-Sensitive Epitope of Monoclonal Antibody 5-2-26 — Akihiko Kawai, Harufusa Toriumi, Tadafumi S. Tochikura, Takuo Takahashi, Yoshikazu Honda, and Kinjiro Morimoto 395

Effects of Long Terminal Repeat Sequence Variation on Equine Infectious Anemia Virus Replication *in Vitro* and *in Vivo* — Drew L. Lichtenstein, Jodi K. Craigo, Caroline Leroux, Keith E. Rushlow, R. Frank Cook, Sheila J. Cook, Charles J. Issel, and Ronald C. Montelaro 408

Gene Expression from the ORF50/K8 Region of Kaposi's Sarcoma-Associated Herpesvirus — William T. Seaman, Dongsheng Ye, Rui Xue Wang, Evelyn E. Hale, Marie Weisse, and E. Byrd Quinlivan 436

The FeLV-945 LTR Confers a Replicative Advantage Dependent on the Presence of a Tandem Triplication — S. Prabhu, P. A. Lobelle-Rich, and L. S. Levy 460

Further Requirements for Cleavage by the Murine Coronavirus 3C-like Proteinase: Identification of a Cleavage Site within ORF1b — Josefina D. Piñón, Henry Teng, and Susan R. Weiss 471

The Role of the L4 33K Gene in Adenovirus Infection — Shawn P. Fessler and C. S. H. Young 507

The Rift Valley Fever Virus Nonstructural Protein NSs Is Phosphorylated at Serine Residues Located in Casein Kinase II Consensus Motifs in the Carboxy-Terminus — Alain Kohl, Vincenzo di Bartolo, and Michèle Bouloy 517

Virus Structure and Assembly

Release of Coronavirus E Protein in Membrane Vesicles from Virus-Infected Cells and E Protein-Expressing Cells — Junko Maeda, Akihiko Maeda, and Shinji Makino 265

Virus–Cell Biology

Adenovirus E4 34k and E4 11k Inhibit Double Strand Break Repair and Are Physically Associated with the Cellular DNA-Dependent Protein Kinase — Julie Boyer, Kent Rohleder, and Gary Ketner 307

A Carboxy-Terminally Truncated Form of the Vpr Protein of Human Immunodeficiency Virus Type 1 Retards Cell Proliferation Independently of G_2 Arrest of the Cell Cycle — Masako Nishizawa, Tetsuya Myojin, Yoshii Nishino, Yutaka Nakai, Masakazu Kamata, and Yoko Aida 313

Impaired Antiviral Response in Human Hepatoma Cells — Päivi Keskinen, Maria Nyqvist, Timo Sareneva, Jaana Pirhonen, Krister Melén, and Ilkka Julkunen 364

Induction of E6/E7 Expression in Cottontail Rabbit Papillomavirus Latency Following UV Activation — Ping Zhang, May Nouri, Janet L. Brandsma, Thomas Iftner, and Bettie M. Steinberg 388

Similarly Organized Lysogeny Modules in Temperate *Siphoviridae* from Low GC Content Gram-Positive Bacteria — Sacha Lucchini, Frank Desiere, and Harald Brüssow 427

Viral Pathogenesis and Immunity

Role of the C-Terminal RDEL Motif of the Myxoma Virus M-T4 Protein in Terms of Apoptosis Regulation and Viral Pathogenesis — Shawna Hnatiuk, Michele Barry, Wei Zeng, Liying Liu, Alexandra Lucas, Dean Percy, and Grant McFadden 290

TNFα, Interferon, and Stress Response Induction as a Function of Age-Related Susceptibility to Fatal Sindbis Virus Infection of Mice — Joanne Trgovcich, Judith F. Aronson, J. Charles Eldridge, and Robert E. Johnston 339

Characterization of Two Chitinase Genes and One Chitosanase Gene Encoded by Chlorella Virus PBCV-1 — Liangwu Sun, Byron Adams, James R. Gurnon, Yen Ye, and James L. Van Etten 376

Expression of Mouse Mammary Tumor Virus Envelope Protein Does Not Prevent Superinfection *In Vivo* or *In Vitro* — John L. Dzuris, Wei Zhu, Denis Kapkov, Tatyana V. Golovkina, and Susan R. Ross 418

Entry of Rotaviruses Is a Multistep Process — Ernesto Méndez, Susana López, Mariela A. Cuadras, Pedro Romero, and Carlos F. Arias 450

Tyrosines 60, 64, and 101 of Epstein–Barr Virus LMP2A Are Not Essential for Blocking B Cell Signal Transduction — Rachel Swart, Sara Fruehling, and Richard Longnecker 485

Development of Replication-Defective Adenovirus Serotype 5 Containing the Capsid and 3C Protease Coding Regions of Foot-and-Mouth Disease Virus as a Vaccine Candidate — Gregory A. Mayr, Jarasvech Chinsangaram, and Marvin J. Grubman 496
